EXPERIENCE

Jatri Services Ltd.

Sr. Software Engineer

- January 2026 – August 2026
- Owned 15+ B2B ticketing apps (bus, launch, toll plaza) sharing a common printing core with domain-specific business logic.
- Implemented a runtime disaster recovery mechanism to switch API base URLs dynamically during primary server outages.
- Delivered a code-wide migration to a new design system, updating shared components and screen styling across all flows.

Software Engineer

- January 2023 – December 2025
- Engineered two mobile apps from scratch using Jetpack Compose and modern Android architecture.
- Fixed memory leaks using LeakCanary, resolving repeated out-of-memory crashes.
- Designed a reusable printing module supporting both USB and Bluetooth receipt printing.
- Built automated CI/CD pipelines with GitHub Actions to streamline test builds to Firebase App Distribution.

Jr. Software Engineer

- April 2022 – December 2022
- Built a custom QR code scanner module leveraging CameraX and ML Kit.
- Developed two toll-collection apps, including a specialized solution for the Mayor Mohammad Hanif Flyover.
- Modernized the codebase by migrating Dagger to Hilt, adopting Clean Architecture, and replacing RxJava with Kotlin Flow.
- Maintained legacy ticket-selling applications for 'Gulshan Chaka' and 'Dhaka Chaka' bus lines to ensure uninterrupted operations.
